

Camilo Taborda

Software Developer | 3D Web Specialist

Profile

Software Developer focused on Front-end and immersive architectures. Specialist in creating high-impact 3D configurators and interactive experiences using React, Three.js, and React Three Fiber. Expert in building scalable applications with Next.js, integrating Supabase for efficient data management and Augmented Reality (AR) to maximize engagement. My approach combines technical performance with innovative aesthetics, delivering next-generation solutions that elevate the user experience.

Technical Skills

Frontend, 3D & Backend

JavaScript (ES6+) / TypeScript

React.js / Next.js

Three.js / React Three Fiber

Supabase (BaaS & Auth)

Tailwind CSS / GSAP

REST APIs / Python (Basic)

Augmented Reality (AR)

Responsive Design & UX

Tools & AI

Git & GitHub

Vite / Vercel

AI-Driven Dev (ChatGPT/Claude)

Framer Motion

Languages

English - B1 (Intermediate)

Spanish – Native

Education

Continuous Learning in Software Development -
Platzi

Specialization in modern frontend architectures, database management, and web performance optimization. Constant updates on the JavaScript ecosystem and immersive technologies.

Professional Experience

77 Render Studio

Software Developer

2021 - 2023

Led the development of interactive software solutions for the real estate sector, implementing 3D viewers that increased customer interaction by 40%. Optimized internal project management workflows, achieving a 25% reduction in project delivery times through asset digitalization.

Ardata Tech

Software Developer

2023 - Present

Responsible for the full frontend lifecycle, transforming static products into real-time configurable 3D models. Implemented Augmented Reality (AR) integration, enabling product visualization in real-world environments. I leverage Next.js and Supabase to ensure fluid, secure, and scalable applications, optimizing conversion rates and the end-user experience.
